(208) 681-0942 or via email at product.training@spudnik.com

Registration & Availability

To register for training, or to obtain more information about training, please contact a member of our training department using the following information:

Email: product.training@spudnik.com

Office: (208) 239-5793

Cell: (208) 681-0942

Dealer Week Trainings

Dealer Week Trainings are opportunities for dealers to select a training topic and/or location. The majority of our trainings are scheduled to be held in Blackfoot, ID, where we hope to be able to frequently host your technical team members and customers. Dealer Week Trainings are opportunities for training to be held off-site at Dealer or Outside Shop locations. These trainings are scheduled on a first come, first served basis.

Request Additional or Currently Unscheduled Training

If you would like to receive training, and are not seeing a date or topic in our training schedule that aligns with your schedule or training requirements, please call to schedule additional training. Just because it's not currently built into the schedule does not mean that we can't make an adjustment or addition.

Scheduling Training for Customers and Operators

Contact our Technical Training Team using the above information to learn more about training opportunities for customers and operators of Spudnik Equipment.

Zoom Training

Online training is also available by request. There is an hourly fee (\$150/hr) associated with provided online training.

Safety and Participant Preparation

Safety is a priority for us at Spudnik. We ask that technicians arrive with steel- or composite-toed shoes and work gloves, as we will often be in a shop environment and working on or around equipment.

General COVID safety protocols are observed associated with room occupancy limits, sterilization of frequently contacted surfaces, and the provision of handwashing stations throughout our facilities.

Troubleshooting systems and machines is a significant part of our training curriculum. We would ask that technicians bring digital multimeters (DMMs) to use during troubleshooting portions of training.

What We Provide

Spudnik provides pre- and post-testing to ensure that technicians are learning the intended concepts. As each training is completed, a technician will receive either a Certificate of Participation or a Certificate of Completion, depending on whether technicians have passed the training post-test. Testing is comprised of both written tests and hands-on testing.

Spudnik provides lunch and snacks during each day of training.

Daily Schedule

Unless otherwise notified, classes begin at 8:00am MST each day and conclude by 4:30pm MST.

Training Schedule Online

To view an Excel-formatted version of the 2022 technical training schedule, which better illustrates scheduling around holidays, weekends, planting and harvest seasons, visit our online dealer reference portal, Spudnik Digital Implements (SDI).

Access a Microsoft Excel formatted version of Spudnik’s 2022 Technical Training Calendar online via SDI (tools.spudnik.com). Dropdown Menu → Dealer Reference → 03_Service → Training Schedule Current Year
